—you shine so bright!

eres brillante!

Lights and shadows are part of us. Becoming aware of it and accepting it naturally, implies embracing peace and well-being, helping us to flow, enjoy, even laugh and love. Let's shine together.

Las luces y las sombras forman parte de nosotros. Tomar consciencia de ello y aceptarlo con naturalidad conlleva abrazar la paz y el bienestar, ayudándonos a fluir, disfrutar, incluso a reír y amar. Brillemos juntos.

—change your light, change your life

tu vida cambia cuando cambias tu luz

The objects that surround us must help us live a more fully and happily life. That is just what we pursue with each of our creations. We design objects thinking about the happiness and comfort of the people who will be in contact with them.

Los objetos que nos rodean deben ayudarnos a conseguir vivir la vida de una forma más plena y feliz. Eso es justo lo que perseguimos con cada una de nuestras creaciones. Diseñamos objetos pensando en la felicidad y el confort de las personas que van a estar en contacto con ellos.

—designed for happiness

diseñado para la felicidad

A design is much more than an attractive aesthetic. Our design speaks of well-being, energy, commitment, respect and awareness. Our team believes in a design available to everyone. Achieving this challenge makes us extremely happy.

El diseño es mucho más que una estética atractiva y resultona. Nuestro diseño habla de bienestar, energía, compromiso, respeto y consciencia. Nuestro equipo cree en el diseño al alcance de todos. Conseguir este reto nos hace tremendamente felices.

We work to become your favourite brand. We have everything you are looking for.

Trabajamos para ser tu marca favorita. Tenemos todo lo que buscas.

te lo ponemos fácil

—we make it easy

—fall in love with us

enamórate de nosotros

Our desire is to become the travel companion of all your projects. And for that reason, we not only focus on the creation of aesthetic designs but also functional, accessible and of quality.

Nuestro deseo es convertirnos en el compañero de viaje de todos tus proyectos. Y por eso, no sólo nos centramos en la creación de diseños estéticos sino también funcionales, asequibles y de calidad.

SOLID

High performance LED downlight.

The whole body of the luminaire is the heatsink itself that is made entirely of aluminum.

The reflector is also made of aluminum and it is available in two opening angles (30 and 65).

Solid is designed to ease the installation; the ceiling anchors can be manipulated with a screwdriver and the driver itself incorporates an anchorage to the luminaire.

Downlight de alto rendimiento LED.

El cuerpo de la luminaria es el propio disipador de calor fabricado íntegramente en aluminio.

El reflector es también de aluminio y está disponible en dos ángulos de apertura (30 y 65).

El solid está diseñado pensando en facilitar la instalación, los anclajes a techo se manipulan con un destornillador y el driver incorpora anclaje rápido a la luminaria.

OPTIC

Adjustable round shaped luminaire.

This family of luminaires is manufactured in different sizes and power which makes it easy to find the one that fits best to your lighting needs.

The LED models incorporate what we call EYE which is a high efficiency heat sink where the chip is housed. This heatsink is designed to accommodate different types of LED and makes it possible for us to replace the LED easily.

The driver is supplied separately.

Surface luminaire.

This family of lighting is manufactured in different sizes and potency, which makes it easy to find the one that fits best your lighting needs.

The LED models incorporate what we call EYE which is a high efficiency heat sink where the chip is housed. This heatsink is designed to accommodate different types of LED and makes it possible for us to replace the LED easily.

We always use top brand LED making sure we can offer the latest technology available in the market and the most efficient led.

The driver is supplied with the luminaire.

Luminaria de superficie.

Esta familia de luminarias se fabrica en diferentes tamaños y potencias por lo que es fácil encontrar la que más se ajuste a nuestras necesidades de iluminación.

Los modelos LED incorporan lo que nosotros llamamos EYE que es un disipador de calor de alta eficiencia donde va alojado el chip. Este disipador está preparado para alojar diferentes tipos de LED y también hace posible que podamos sustituir el LED fácilmente.

Siempre utilizamos LED de primeras marcas asegurándonos de poder ofrecer la última tecnología disponible en el mercado y los led más eficientes.

El driver se suministra con la luminaria.

RECESSED DRAINAGE

EN	ES	FR	ITA
Placing sunken lighting in the ground All sunken lights are ready for installing in the ground or in cement. Always ensure that they are not placed in watercourses or depressions in the ground. Position the mounting box surrounded by the fastening material to ensure that it does not tip or fall over. There must be a layer of gravel below and around the mounting box for draining purposes (see drawing). Correct drainage should allow 5 litres of water to be absorbed within 8 minutes. The glass can reach high temperatures, so contact with people and objects should be avoided. We recommend that the outside of the apparatus be cleaned regularly to stop foreign materials from preventing the dissipation of heat which leads to changes in the components and a loss of watertightness. Follow the installation and assembly instructions and maintenance recommen-dations very carefully.	Colocación del empotrable en el terreno Todos los empotrables están previstos para una instalación en tierra o en cemento. Evite siempre colocarlo en vaguadas o depresiones del terreno. Coloque la caja de empotrar rodeada de material de sujeción para evitar que se incline o se hunda. Por debajo y alrededor de la caja de empotrar debe existir una capa de grava para drenaje (ver dibujo). Un drenaje correcto debe permitir la absorción de 5 litros de agua en 8 minutos. El cristal puede alcanzar temperaturas elevadas por lo tanto evite el contacto con personas o cosas. Es aconsejable limpiar frecuentemente el exterior del aparato para evitar asi que materiales extraños impidan la disipación del calor con la consiguiente alteración de los componentes y pérdida de estanqueidad. Siga detenidamente las instrucciones de instalación y montaje así como las recomendaciones de mantenimiento.	Installation de l'encastrable sur le terrain Tous les luminaires encastrables sont prévus pour une installation dans la terre ou le ciment. Évitez toujours de les installer dans des lignes de creux ou des dépressions du terrain. Installer le boîtier d'encastrement avec ses supports afin d'éviter qu'il ne soit incliné ni trop enfoncé. Sous le boîtier d'encastrement et autour de celui-ci, il doit y avoir une couche de gravier pour le drainage (voir dessin). Un drainage correct doit permettre l'absorption de 5 litres d'eau en 8 minutes. Le verre peut atteindre des températures élevées, évitez par conséquent tout contact avec les personnes ou des objets. Il est conseillé de nettoyer fréquemment l'extérieur de l'appareil, afin d'éviter que des corps étrangers n'empêchent la dissipation de la chaleur puis l'altération des composants et la perte d'étanchéité. Suivez attentivement les instructions d'installation et de montage, ainsi que les recommandations de maintenance.	Collocazione dell´incasso nel terreno Tutti gli incassi sono pensati per la collocazione in terra o cemento. Evitare sempre di installarli in zone umide o depressioni del cemento. Installare sempre l´incasso circondato da materiale d`appoggio, per evitare che si inclini o affondi. Sotto ed intorno all´incasso deve sempre esserci sabbia drenante (disegno). Un drenaggio efficace deve permettere l´assorbimento di 5 litri d´acqua in 8 minuti. Il vetro puo' raggiungere temperature elevate, per tanto evitare il contatto con persone o cose. Si consiglia di pulire frequentemente l' esterno degli apparati per evitare che corpi estranei impidano la dissipazione del calore con conseguente alterazione dei componente e perdita delle stagnezza. Seguire attentamente le indicazioni di installazione e montaggio, cosi come le norme di manutenzione.
Condensation To minimise possible condensation inside the device, turn it on for 1 hour without the protective glass, closing it immediately once this time has elapsed.	Condensación Para minimizar la posible condensación de vapor de agua dentro del aparato, debe hacerse funcionar durante 1 hora sin el cristal de protección, transcurrido ese periodo de tiempo, cierrelo immediatamente.	Condensation Pour minimiser les risques de condensation de la vapeur d'eau intérieur de l'appareil doit être exploité pendant une heure sans le verre de protection, après cette période temps, fermer immédiatement.	Condensazione Per evitare la possibile condensazione di vapore acqueo all' interno dell' apparato, deve porsi in funzione durante una ora senza il cristallo di protezione e poi procedere alla chiusura immediatamente.
BEACONS To ensure the proper convervations of beacons we recommend theri installation on a plinth, never directly onto the ground or lawn.	BALIZAS Para una correcta conservación de las balizas, recomendamos su aplicación sobre una pilastra a un nivel superior, y nunca sobre tierras o césped.	BALISES Pour un bon maintenance de balises, nous recommandons son application sur un pilier à un niveau supérieur, et jamais sur terre ou sur l'herbe.	PALETTI Per una corretta conservazione dei paletti raccomandiamo la sua applicazione su di una base ad un livello piu alto, mai su terra o erba.
⚠ In order to validate the warranty the external connection must have always the protection index (IP) with an equal or a superior value of the ip shown on the lamp.	⚠ Para poder hacer uso de la garantia es imprescindible que la conexión externa sea de un indice de protección (IP) igual o superior a la luminaria adquirida.	⚠ Pour que la garantie soit valable, il est indispensable que la connexion externe soit d'un indice de proteccion (IP) égal ou supérieur à celui du luminaire acheté.	⚠ Per poter usufruire della garanzia é imprescindibile che la connessione esterna sia di un indice di protezione (IP) uguale o superiore a quello indicato sulla lampada acquistata.

STAINLESS STEEL

EN	ES	FR	ITA
Cleaning and maintenance of stainless steel It is advisable to follow the recommendations listed below for the correct maintenance and upkeep of all products manufactured from stainless steel In industrial or coastal areas localized corrosion can be caused by the accumulation of contaminants carried by the air. By using a cloth or duster will insure the elimination of these contaminants. In the case dirt which is more difficult to remove, it is recommended the use of a cleaner which includes phosphoric acid, ensuring that a scrubber or soft nylon brush is used, never use a steel scrubber. It is recommendable to clean stainless steel every 6 to 12 months for average dirt and every 3 months for more severe cases. Especially in the following atmospheric conditions - Marine atmospheres. - Atmospheres which contain a lot of industrial contaminants. - Atmospheric and traffic pollution.	Limpieza y mantenimiento del acero inoxidable Le aconsejamos que siga las siguientes recomendaciones para la conservación y mantenimiento de todos aquellos artículos fabricados en acero inoxidable. En zonas industriales o costeras se pueden producir corrosiones localizadas por acumula-ciones de contaminantes llevados por el aire, asegúrese que se eliminan dichos contaminantes utilizando un paño húmedo o una gamuza. En caso de suciedad más difícil le recomendamos que utilice un limpiador que incluya ácido fosfórico siempre con el uso de estropajos o cepillos suaves de nylon, nunca usar estropajos de acero. La frecuencia de limpieza que le recomendamos para una suciedad moderada es de 6-12 meses y de 3 meses cuando es más abundantes. Especial-mente en ambientes que recojan las siguientes condiciones: - Atmósferas marinas. - Ambientes cargados de contaminantes industriales., - Suciedad atmosférica y del tráfico.	Nettoyage et entretien de l'acier inoxydable Nous vous conseillons de suivre les suggestions pour la conservation et entretien de tous les articles fabriqués en acier inoxydable. Dans les zones industrielles ou proches au littoral, il peut s'y produire des corrosions localisées par l'accumulation de contaminants apportés par l'air, assurez-vous que ces contaminants puissent s'éliminer avec un torchon humide o une peau de chamois. En cas de saleté plus difficile, nous vous conseillons d'utiliser un nettoyant à base d'acide phosphorique, toujours à utiliser avec des tampons à récurer ou des brosses douces en nylon, ne jamais utiliser de tampons à récurer en acier. La fréquence de nettoyage que nous vous conseillons pour une saleté modérée est de 6 à 12 mois et de 3 mois quand celle-ci est plus abondante. Surtout dans les ambiances avec les conditions suivantes: - Atmosphères marines. - Ambiances chargées de contaminants industriels. - Saleté atmosphérique et de circulation.	Pulizia e manutenzione dell' acciaio inossidabile Consigliamo di seguire le raccomandazioni per la conservazione e manutenzione di tutti quei prodotti fabbricati in acciaio inossidabile. In zone industriali o costiere si possono produrre corrosioni localizzate a causa dei contaminanti presenti nell'aria ; suddette corrosioni si possono eliminare utilizando un panno umido o di camoscio. In caso di sporcizia piu' difficile raccomandiamo l' utilizzo di acido fosforico come prodotto di pulizia e manutenzione (utilizando spugnette, panni soffici o spazzole di naylon). La frequenza raccomandata é : 6-12 mesi per una sporcizia moderata, 3 mesi per le piu' difficili. Ambienti critici: - Atmosfera marina - Ambienti carichi di contaminanti industriali - Atmosfere cittadine con elevato índice di traffico.
